**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2181

1. Claims 1-26 are presented for examination.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 2-3, drawn to a dedicated communications register, classified in class 712, subclass 225.
  - II. Claims 4 and 8-10, drawn to synchronization of pipelines, classified in class 712, subclass 220.
  - III. Claims 5-7, drawn to bypass circuitry, classified in class 712, subclass 218.
  - IV. Claims 11-20, drawn to floating point pipeline control, classified in class 712, subclass 222.
  - V. Claims 21-25, drawn to parallel decoders, classified in class 712, subclass 212.
  - VI. Claim 26, drawn to instruction data fetching, classified in class 712 , subclass 205.
3. Inventions I, II, III, IV, V, and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as in a computer system having a dedicated communications register but lacking the unique features of the other 5 claimed inventions. Subcombination II has separate utility such as in a computer system having a dedicated communications register but lacking the unique features of the other 5 claimed

Art Unit: 2181

inventions. Subcombination III has separate utility such as in a computer system having a dedicated communications register but lacking the unique features of the other 5 claimed inventions. Subcombination IV has separate utility such as in a computer system having a dedicated communications register but lacking the unique features of the other 5 claimed inventions. Subcombination V has separate utility such as in a computer system having a dedicated communications register but lacking the unique features of the other 5 claimed inventions. Subcombination VI has separate utility such as in a computer system having a dedicated communications register but lacking the unique features of the other 5 claimed inventions. See MPEP § 806.05(d).

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

7. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 2181

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

8. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

9. Any inquiry concerning this communication should be directed to William M. Treat at telephone number (571) 272-4175.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
